

AXIGEN MESSAGING FOR BUSINESSES

The full benefits of email communication and collaboration, integrated in a smart and secure solution based on a powerful mail server for business.

Axigen is an easy, secure and powerful mail server based on innovative technologies, providing unmatched manageability for system administrators. [It] offers excellent email functionality for organizations of all sizes, [...] but at a much lower cost than Exchange.

Email, Calendaring and Collaboration

Powerful technology...

Axigen's high-performance mail server technology is specifically built to provide you with fast and secure email communication (via Axigen SmartProcessing™ and Axigen GrowSecure™), while ensuring effective space management (via intelligent Axigen UltraStorage™).

Schedule meetings & organize tasks

Organize your business with effective time-management tools such as personal and public calendars, tasks and notes, available from WebMail, MS Outlook and iCal (Webcal) compatible clients.

...adapted to work the way you do

Available on both Windows and Linux OS, the Axigen messaging solution for businesses adds to this powerful technology just the right touch of everything: email, calendaring and collaboration, all backed-up by efficient 24x7 technical support.

Share & delegate

Share email and calendar folders, contacts, appointments or tasks with co-workers, and allow them to view your availability (Free / Busy status). Delegate calendar / message replies – when out of the office, allow a replacement to confirm meetings, read and send emails on your behalf.

Local and Remote Access

MS Outlook & other desktop clients

Communicate using MS Outlook – while taking full advantage of Axigen's calendaring and collaboration (via our Outlook Connector), or by using your favorite POP3 / IMAP client such as Mozilla Thunderbird or Apple Mail.

Mobile sync with BlackBerry® ...

Gain instant access to relevant data such as email messages, contacts or calendars from your BlackBerry® smartphone, via the AstraSync™ or the NotifySync™ client.

Axigen WebMail

The customized, user-centric look and feel of Axigen's WebMail interfaces (Ajax / standard / mobile) seamlessly approach the desktop experience even when you are accessing email remotely.

...and ActiveSync®-enabled phones

Synchronize your email, contacts, calendars or tasks by using Axigen's built-in Exchange ActiveSync® support for mobile devices (Nokia, iPhone, Windows Mobile devices etc).

Whether you're searching for a replacement for your current resource-draining mail server or simply looking for a more economical way to provide your end users with a best-in-class messaging and collaboration platform, you should certainly consider Axigen.

Extensive Security Toolset

Multi-layer security

The Axigen messaging platform guarantees secure reception, transit and delivery of email. Protect your confidential data with an extensive set of defensive tools, such as: authentication and encryption, anti-impersonation policies, SPF and DomainKeys compliance, blacklisting / whitelisting / greylisting, country filtering, and many more.

AntiVirus / AntiSpam integration

For extra email protection, you can extend Axigen's standard ClamAV and SpamAssassin defensive tools by integrating any of the available commercial AntiVirus / AntiSpam apps. Further, get premium defense with the Commtouch Real Time AntiSpam Protection & the AVG AntiVirus and AntiSpam add-ons.

Effortless Administration

Web administration console & CLI

Configure service specific parameters through Axigen's comprehensive WebAdmin, designed for optimized navigability, with quick links and contextual help. Alternatively, automate administrative or provisioning tasks by using the Command Line Interface.

Backup & archiving

Get full / partial restores, offline and online backups, or access from more than one location, via the Back-up and Restore module. Meet regulatory compliance requirements of major international standards through integration with third-party archiving applications.

Ask for Evaluation

All the Axigen product kits can be downloaded as evaluation versions for 30 days, with:

- All features enabled
- Unlimited users
- Unlimited domains
- FIRsT Support included

axigen.com/download

Friendly licensing terms

The flexible licensing model allows you to focus on growing your business, via:

- "Pay for what you use" licensing
- Perpetual, OS independent licensing
